

Global Service Training a Success in Oklahoma

In February, 2011 Terex® Minerals Processing Systems (MPS) hosted a service training seminar at our facility in Oklahoma City. 64 Distributor Attendees were present in addition to 14 Terex Service Managers from 7 countries around the world. After overcoming a major winter storm, the event was held at the Terex training hall and included hands-on and classroom training.

The goal of the training was to provide continuing education on technical service to our employees and distributors in order to provide the best possible customer service in our industry. Thank you to the presenters and also thank you very much to the attendees for your participation. We take pride in our customer service and look forward to the next training seminar.
